

Visit us in hall 6 at booth N16

The majority of speciality process gases used in wafer processing, solar and MEMS manufacturing are either pyrophoric, toxic, or corrosive. Safety of personnel and protection of the environment are matters of the highest priority.

CS CLEAN SYSTEMS customers worldwide avail of a local service for the collection and refilling of expended CLEANSORB columns, which are patented, UN-approved and reusable transport containers.

A wide range of CLEANSORB model sizes are available to meet the needs of all our customers - from small-scale university researchers to round-the-clock fabrication.

Range of CLEANSORB® columns

CLEANSORB® granulates

Our proprietary granulates have been optimized for many process gases and liquid precursors used in the solar, semiconductor and MEMS industries.
