

DECKER

wet chemical equipment

Find out more about DECKER

Visit our over 5,000 sqm production plant in Berching (Bavaria), experience our PV etching equipment up close and get to know our experienced team over a hearty Bavarian meal.

You have the choice!

At the Photovoltaic Technology Show in Stuttgart, we are available for consultation at booth G9, hall 4. In addition, we would like to offer you the opportunity to see much more of DECKER. Just relax and enjoy the journey to Berching in our own personal shuttle service. All you have to do is contact us and make an appointment during the exhibition week of the Photovoltaic Technology Show in Stuttgart!

We look forward to welcoming you at DECKER!

Your personal day at DECKER

1. Meeting at the Photovoltaic Technology Show in Stuttgart
2. Shuttle service (from Stuttgart) to Berching
3. Personal welcome by our managers
4. Guided tour of the production halls
5. Demonstration of a chunk etching unit in operation
6. Hearty Bavarian lunch / dinner
7. Personal consultation
8. Shuttle service back to Stuttgart

This is just a proposal. We would be happy to adjust the schedule to suit your individual requirements!

DECKER

wet chemical equipment

DECKER not only offers approved system equipment, but also special solutions for all wet chemical cleaning steps when producing silicon. Our profound knowledge of cleaning, etching, drying, recycling, handling and waste gas treatment enjoys high esteem in the semiconductor and PV industry.

In a clean production area of 5,000 sqm our construction, production and sales teams work together closely. This facilitates the prompt implementation of decisions and creates ideal conditions for continually improving our already efficient equipment.
