SHOW INFORMATION

PHOTON's 5th Photovoltaic Technology Show 2010 February 2 – 4, 2010, San Francisco USA

After four successful shows and our expansion of PHOTON USA Corp., we are now poised to bring our successful PTS (Photovoltaic Technology Show) formula to the US. The timing seems to be perfect:

- The US federal government's 2009 solar PV R&D investment level will reach its highest level in 28 years, thanks to President Obama's announcement on May 27 of an additional \$117.6 million. The total PV R&D budget in 2009 amounts to \$237 million, a 75-percent increase over 2008.
- Module prices have fallen to levels never seen before. Hardly any homeowner looking for a profitable investment can afford to neglect solar now.
- The US government is currently in the process of finalizing guidelines for its new subsidy program making solar technology even more attractive.

THE US SOLAR INDUSTRY PROSPECTS ARE LOOKING BRIGHT! – BE A PART OF IT!

PHOTON's 5th Photovoltaic Technology Show will take place in California, THE centre of the USA's PV industry. Thus, it is unquestionably the perfect place for international start-up firms and key industry players to meet potential partners and new customers.

PHOTON's 5th Photovoltaic Technology Show will feature:

- Manufacturing equipment (e.g. cell and module production lines)
- Semi-finished and finished products (e.g. cells, modules, inverters, BOS components)
- Raw materials and supplies
- Exploratory and applied research
- Test and measurement equipment
- Product and process certification
- Software solutions (e.g. process and quality control)

As in previous years, the show will be accompanied by PHOTON Academy's first-class conference series, which attracts high-level industry experts as well as start-up firms introducing innovative products and concepts!

Benefit from a modern and professional show, organized by the publishers of »PHOTON International,« the world's leading English-language PV publication!

**THE PHOTON EXPO TEAM IS
LOOKING FORWARD TO WELCOMING
YOU IN SAN FRANCISCO!**
